

### Advisory Note 16 Suppliers of Insect Screens and Fly Killers

In areas where food is prepared the Food Hygiene (England) Regulations 2006 require openable windows to be screened if: -

- They open directly into food preparation areas; and
- They are open food ventilation during food preparation; and
- Screening is necessary to prevent a risk of infestation and / or contamination.

Where dirt build-up on insect proof screens may also present a risk of food contamination, the screens must be designed to be easily removed for cleaning. It is therefore recommended that you contact a suitable supplier for advice on meeting this requirement.

| Name of Supplier                 | Telephone Number                 | Product Type  |
