Foreword

Foreword from the joint chairs of the Salford Community Safety Partnership.

The people of Salford say that better community safety, tackling anti-social behaviour and keeping our streets clean and safe are among their major concerns. In partnership, we are committed to making Salford an even safer, cleaner, greener city. We will work closely with our communities through neighbourhood policing and neighbourhood management teams to provide local solutions for local problems.

Over the last three years we have reduced crime significantly compared to three years ago. For example, we have achieved a 24% reduction in house burglaries and reduced violent assaults by over 750 incidents. But there is still much to do because Salford compares badly with similar areas. Over the next three years we will set challenging targets for reducing crime and disorder.

We are all aware that there is going to be considerable reductions in money for public services over the next few years, including police services. That means that we need to focus the resources we have more sharply on priorities, and use them more effectively.

Our population is growing and the city is home to a broad cross-section of people. We are proud of this diversity and the tolerance and respect that people display towards each other. We will continue to support and encourage greater cohesion amongst all our communities and citizens.

The city is also increasingly attracting new business and development, not least because of better community safety. This reinforces the city's reputation as a place to invest and it supports economic regeneration.

It is the responsibility of all of us who live and work in Salford to play our part in making our neighbourhoods safer. The success of this strategy relies on us working together to achieve further improvements in community safety.

Ben Dolan

Strategic Director for Environment and Community Safety, Salford City Council

Kevin Mulligan

Chief Superintendent, Salford Division, Greater Manchester Police

Context

A changing city

The citizens of Salford

The number of people living in Salford is increasing both through birth rate and inward migration. By 2024 the current population of 225,100 is projected to increase by nearly 10% to over 240,000 and the make-up of the population is also projected to change significantly. As well as an ageing population, in the last few years Salford has experienced a 30% growth in the number of residents aged 20 to 24 years, the highest growth rate in Greater Manchester.

By 2024 it is thought that there will be 44,700 older people in the city and the number of people aged over 75 living alone is projected to increase by 15% to 8,570 individuals.

Social deprivation remains an issue, with significant gaps between the most and least deprived parts of the city, and also between Salford and the rest of the North West and UK. Almost 30% of children in Salford live in workless poverty, with more than 6,000 families dependent on out-of-work benefits.

There is a major challenge in reducing the number of workless people on sickness and disability benefits and nearly half of all people claiming incapacity benefit in Salford do so for mental health reasons. There are increasing demands on the range of services aimed at people with disabilities and an increasing rise in the numbers of adults aged 60 or over with learning difficulties.

Around 8% of the population of the city is non-white. Salford has a mix of black and minority ethnic (BME) and faith communities unique to the region. The Orthodox Jewish community is the second biggest outside London and numbers in the region of 10,000 people, meaning that around 10% of all young people in Salford are Jewish. Other long standing communities in the city include the Yemeni, Bangladeshi and Pakistani communities in Eccles.

Since 2004, Salford, like many areas in the country, has seen an influx of migrant workers from central and eastern Europe, moving into the central and east Salford wards and the Eccles area. Much of the growth in the city's population can be attributed to this inward migration.

There is a comparative lack of quantitative data on lesbian, gay, bisexual and transgender communities in Salford, but it is known that there is a relatively well-established community in the Lower Broughton and Pendleton areas.

Salford University hosts a substantial and diverse student population. 18% of the student population is of BME heritage and the majority live in the area surrounding the university campus.

The place

Salford is a city of contrasts, ranging from the dense urbanised core of Central Salford, through established suburban housing areas, to areas of high value housing and open countryside to the west.

Regeneration projects are transforming large areas of Salford, although there remain pockets of social deprivation. Substantial physical regeneration is taking place in Central Salford, focused on making the area physically, socially and economically desirable and safe. MediaCityUK, anchored by the arrival of five BBC departments in 2011, nears completion, with a Metrolink stop and new commercial and leisure facilities bringing vibrancy to the area.

The Salford West Strategic Regeneration Framework continues to bring physical improvements to the west of the city, notably making a real difference to the landscape of Liverpool Road and along the Bridgewater Canal. Emerging plans for Port Salford and the Salford Community Stadium are planned to boost the economic future of this part of the city.

Introduction

This is Salford's fifth Community Safety Strategy. The strategy identifies the activity that the Community Safety Partnership will prioritise over the next three years and it supports Salford's overarching Sustainable Community Strategy.

The Salford Community Safety Partnership comprises public and private agencies each with their part to play in reducing crime and disorder and making our neighbourhoods safer, cleaner and greener.

Alongside this strategy a detailed action plan will show how we are going to deliver our crime and disorder reduction activities. It will contain specific targets to achieve delivery and will be updated and reviewed regularly to ensure that we continue to deliver on our strategic aims and objectives.

The Community Safety Partnership is committed to working with all our communities including older and younger people; faith; disability; black and minority ethnic and lesbian gay, bi-sexual and transgender communities to make Salford safer. We seek to engage with them and support them to become involved in solving some of the crime and disorder problems affecting them. We also seek to empower our communities by informing them of how the partnership is performing and enabling communities to challenge the work of the partnership. This strategy provides a framework for the many activities that will contribute to continued reductions in crime and disorder in the city.

We recognise that deprived areas suffer a disproportionate amount of crime and disorder and are vulnerable to a breakdown of community cohesion and we are working to reduce inequalities and to improve the quality of life in these neighbourhoods.

Although we take action across the city to reduce crime and disorder, we have identified priority wards with particular needs. These are:

- Ordsall
- Langworthy
- Broughton (Life Chances pilot)
- Walkden North
- Irwell Riverside
- Barton
- Winton (Life Chances pilot)
- Little Hulton (Life Chances pilot)

The government has said that it will publish a new crime strategy in 2011, which will set out in detail how the approach to preventing and reducing crime will be reshaped. This Community Safety Strategy may then need to be reviewed to see how the government's strategy impacts on it.

Our strategic aims

We have set two overarching aims in this strategy:

- **To build safer, stronger, more confident communities**
- **To increase community safety and reduce the fear of crime**

By achieving these aims we contribute to the Salford Strategic Partnership's vision for the city:

“Our vision for the city is that Salford will be a beautiful and welcoming city, driven by energetic and engaged communities of highly-skilled, healthy and motivated citizens, who have built a diverse and prosperous culture and economy which encourages and recognises the contribution of everyone, for everyone.”

To achieve these aims, we will focus our activities where they are needed most.

Community safety objectives 2011-2014

Within the overarching aims, we have set out four key objectives:

- Helping all our communities feel safer
- Reducing crime
- Effectively tackling anti-social behaviour together with the community
- Reducing the harm caused by drug and alcohol misuse

We are committed to building on the progress we have made in recent years in continuing to drive crime and disorder down.

What we achieved over the last three years - 2008-2011

On delivering the 2005 – 2008 strategy we have seen significant reductions in crime and disorder, for example:

Type of crime	Percentage change
Serious acquisitive crime	42% reduction
Serious violent crime	20% reduction
Domestic burglary	23% reduction
Vehicle crime	50% reduction
Criminal damage (including arson)	47% reduction
Assault with injury	34% reduction
Perceptions of anti-social behaviour	Improved from 31.5% of respondents reporting anti-social behaviour as a problem, to 19% of respondents.

These figures use recorded crime data covering the three years from April 2008 to March 2011 compared to the 2007/08 baseline and perception data from public surveys.

Engaging with our communities

In developing this strategy, we have consulted extensively with the people of Salford and this tells us that the public want us to:

- Reduce the level of crime in Salford.
- Tackle anti-social behaviour.
- Improve the street environment.

The issues of concern identified in relation to anti-social behaviour were:

- Rubbish or litter lying around.
- Teenagers hanging around on the streets and behaving anti-socially.
- Criminal damage to property such as graffiti.

We have taken account of these views in setting the strategy. We will continue to seek views throughout the life of the strategy. We are committed to engaging with all our communities including older and younger people; faith; disability; black and minority ethnic and lesbian gay, bi-sexual and transgender communities. We will meet through community committees, community groups, police beat meetings and other forums.

We will also use localised newsletters and [our web pages](http://www.salford.gov.uk/crimereduction) (www.salford.gov.uk/crimereduction).

Local crime mapped data can be viewed on [the Greater Manchester Police website](http://www.gmp.police.uk) (www.gmp.police.uk) and on [the government crime mapping website](http://www.police.uk) (www.police.uk).

We will seek to empower our diverse communities by giving them the confidence, skills and power to influence what the partnership does for them and to help them become involved in solving local crime and disorder issues.

We will engage with all our communities in line with the Partners in Salford Community Engagement and Empowerment Policy.

Objective 1: Helping all our communities feel safer

We have continued to make significant reductions in crime and disorder in Salford and people are safer, but experience throughout the country has shown that people's perception of the level of crime does not necessarily decrease as crime levels fall. This has also been our experience in Salford and we will counter this by keeping the people of Salford well informed about levels of crime and disorder around the city so that people can understand the real risks of being a victim of crime.

We will work with our more vulnerable groups such as the elderly and people with learning difficulties, to understand their particular needs and to address their issues.

We recognise that we have a diverse population in Salford made up of residents, students and business people. We wish to empower all of our communities so they have the opportunity to be fully engaged in decision making and providing solutions to some of the issues we face.

A priority for us is to provide appropriate and timely support for victims and witnesses of crime to help people feel safer and to feel confident in the response and service they receive after reporting a crime.

An important element of helping communities feel safer is to ensure that we build and maintain safer environments, and improve the street scene so that people feel secure when out and about in the city.

In 2010 there were over 550 reports of hate crime in Salford, the majority being race hate crimes. Hate crime is an offence against an individual motivated by race, religion or faith, sexual orientation, disability, gender or gender identity and has a profound negative effect on people's confidence and feelings of safety.

We will further promote cohesion and reduce tension in our communities. We will work with our communities to gather information to protect the public from the minority who may intend to do us harm.

There is a small minority of people in Salford who are involved in serious and organised crime, often through fraudulent businesses which facilitates their criminal activity. Organised crime has a corrosive effect on our communities and we are committed to reducing the harm caused by these groups. By working together, agencies are using a wide range of powers such as anti-social behaviour legislation, licensing, benefit fraud and criminal investigations to disrupt and close down their activities. Salford is at the forefront of this work and is shaping the Home Office's Organised Crime Strategy that is to be published in 2011.

We will also prioritise public transport crime as we understand what an important resource public transport is, particularly to the most vulnerable members of our community.

We will address these priorities by:

- Understanding the issues in each neighbourhood and acting on local needs and priorities.
- Understanding the issues for vulnerable people who are more at risk of becoming victims.
- Informing the community about how we are performing.
- Supporting victims and witnesses, improving their safety and security and helping them through the criminal justice system.
- Providing better quality information about how offending is being addressed and how offenders are being brought to justice.
- Improving the street scene by tackling litter, dog fouling, graffiti and other problems, and repairing and improving street lighting and furniture.
- Working with communities to make vulnerable locations safer.
- Building a safer environment by 'Designing Out Crime,' where the design of physical structures can deter criminal activity.
- Embedding the use of the recently developed 'hate crime toolkit' in each neighbourhood.
- Strengthening relationships with high risk communities and increasing community confidence in the hate crime reporting process.
- Providing support to victims of hate crime and supporting staff to be confident and knowledgeable about tackling hate crime.
- Increasing the opportunity for communities to provide information and intelligence to reduce community tensions.
- Using all partner agency powers to target and remove the harm caused by serious and organised crime groups.
- Using the public transport safety and security 'toolkit' to increase safety on the public transport network.
- Providing Home Safety Fire Assessments to help people keep safe in their own homes.

We will monitor our performance using these measures:

Perception surveys about resident's feelings of safety

Street and environmental cleanliness measure

Hate crime measures

- hate crime reporting rates
- hate crime sanction detection rates

Objective 2: Reducing crime

We will work hard to drive down all types of crime including robbery, burglary, motor vehicle crime and violent crime and we are committed to building on the progress we have made in these areas over the past three years. We are sensitive to the risk that the current economic climate may have a negative impact on crime levels.

Reducing re-offending and preventing people entering the criminal justice system is a priority for the city. Restorative justice approaches ensure that offenders take responsibility for the harm they cause to victims and the community. Salford partners use a whole system approach which enables integrated offender management and this has made a significant contribution to crime reduction.

Domestic abuse is an issue in Salford. We have made significant progress in detecting domestic abuse offences. We prioritise supporting vulnerable victims and witnesses of these crimes and securing justice for them. We also take very seriously our responsibility to protect our more vulnerable members of the community against violence.

Over this time we have seen new businesses being attracted to Salford. Ambitious regeneration and redevelopment in parts of Salford means that we have an increasing population, and our university and further education colleges are attracting a growing number of students.

This strategy will support our city's improving economy by further reducing crime against businesses and new developments. We will continue to protect our public buildings, such as schools, libraries and community facilities. We will also protect our open spaces from criminal fly tipping and criminal damage by identifying and prosecuting offenders.

We will achieve this by:

- Running targeted policing operations against robbery, burglary, vehicle crime and violent crime.
- Using all of our partnership powers to tackle crime, for instance encouraging private car park operators to do all they reasonably can to reduce the risk of crime to their customers and enforcing legislation around scrap metal dealers, car salvage operators and second hand goods dealers.
- Providing personal and home safety advice and equipment to individuals and vulnerable groups and supporting and protecting victims and witnesses of crime.
- Rolling out restorative justice practices across the city.
- Reducing first time entrants into the criminal justice system and targeting prolific offenders.

- Focusing on repeat incidents of domestic abuse and hate crime and supporting and protecting victims.
- Implementing the Violence Against Women Strategy to reduce violence against the citizens of Salford.
- Providing crime prevention and security advice to businesses and working in partnership with private developers to ensure that new developments are designed and constructed to reduce the opportunity for crime.
- Reducing crime against schools and other public buildings.

We will monitor our performance using these measures:

Overall crime rate

Crime rates for burglary dwelling, vehicle crime and robbery (serious acquisitive crime)

Serious violent crime rate

All assault rate (including domestic abuse)

Monitoring information from domestic abuse interventions

- domestic abuse sanction detection rate

Re-offending rate of people subject to offender management

First time entrants to the criminal justice system

Objective 3: Effectively tackling anti-social behaviour together with the community

Tackling anti-social behaviour is a priority for the community. We will continue to drive down levels of anti-social behaviour by intervening early to prevent problems from escalating and taking enforcement action where problems persist despite this early intervention. We will focus on dealing with alcohol and drug fuelled anti-social behaviour, as well as the nuisance and inconsiderate behaviour which causes damage to communities and neighbourhoods. We are committed to using restorative justice solutions so that anti-social offenders are seen to make recompense to their victims.

We are committed to working with all our partners to tackle anti-social behaviour and we recognise the key role which housing providers such as City West Housing Trust, Salix Homes and others have in dealing with issues affecting neighbourhoods in Salford. We will work closely with housing providers delivering services in neighbourhoods and will ensure that the work which they do complements and supports the aims of our strategy.

We recognise that there are seasonal fluctuations in anti-social behaviour, in particular levels rise in the summer holidays and around Halloween and Bonfire Night and we plan specific operations at these times.

We recognise that a significant proportion of anti-social behaviour is committed by adults and we will continue to tackle this.

In addition, whilst public surveys show a significant improvement in perceptions of anti-social behaviour, many people have indicated a wish to tackle anti-social behaviour committed by young people. We will work with young people to divert them from such behaviour.

We have achieved significant reductions in cases of arson but we recognise that this is still an issue in some neighbourhoods and we will continue to work hard to reduce arson incidents.

We will achieve this by:

- Using appropriate action to deal with specific individuals and groups who are behaving anti-socially.
- Using all our powers to enforce against environmental crime offenders including on the spot penalty notices and overt and covert operations.
- Proactively investigating and prosecuting perpetrators of environmental crime such as fly tipping.
- Making full use of our licensing laws, including health and safety legislation, to improve the management of licensed premises.
- Seizing nuisance off-road vehicles.

- Running SNAPs – Sustainable Neighbourhood Action Projects - in hotspot locations.
- Providing positive activities for young people, particularly in the evenings, at weekends and during the school holidays.
- Providing support for families and children who are involved in anti-social behaviour which affects the wider community.
- Through the Youth Offending Service, offering an assessment and appropriate intervention to young people who are at risk of offending including restorative justice approaches.
- Identifying hotspot areas for anti-social behaviour to allow for targeted responses.
- Continuing our arson reduction initiatives to reduce arson incidents.

We will monitor our performance using these measures:

Perceptions of anti-social behaviour

Anti-social behaviour incident rates and actions taken

Criminal damage rates

Parenting contract and management measures

Satisfaction with the way police and local council dealt with anti-social behaviour measured by public surveys

Understanding of and dealing with local concerns about anti-social behaviour and crime, by the local council and police as measured by public surveys

Arson incidents

All assault rate (including domestic abuse)

Objective 4: Reducing the harm caused by drug and alcohol misuse

It is well known that the misuse of drugs, including alcohol, fuels crime. Their problematic use also has a major impact on people's health and wellbeing. Misuse of alcohol is a known contributor to violent crime.

Drugs

The government changed the national drug strategy in 2010 which details the approach to tackling drugs and addressing alcohol dependence. The focus now is on reducing demand, restricting supply, and building recovery from drug addiction.

We will be targeting drug using repeat offenders and will develop a dedicated criminal justice drug, alcohol and mental health service.

We will continue to deliver the Drug Interventions Programme to ensure that offenders are encouraged to seek treatment and recovery at every opportunity in their contact with the criminal justice system.

Alcohol

The annual national cost of alcohol related crime and anti-social behaviour is estimated to be £7.3 billion with 1.2 million violent incidents and 36,000 domestic abuse incidents linked to alcohol misuse.

Alcohol related harm is an issue in Salford. The risks associated with alcohol related harm include the impact on individual and community safety, health and family and social wellbeing.

In relation to community safety, we recognise that young people are accessing alcohol at a younger age and we will continue to deliver educational, diversionary and preventative measures to address the issue of young people and alcohol consumption.

Enforcement work including test purchasing for under age sales of alcohol will continue. We will encourage retailers to be responsible and will enforce breaches of the law through licensing powers.

We will target alcohol related violent crime through policing and partnership operations and through the criminal justice system using the Integrated Offender Management model.

We will achieve this by:

- Moving from treatment systems based on prescriptions towards services that provide a greater degree of social and psychological support.
- Implementing the Drug Interventions Programme.
- Identifying high crime causing drug users so as to target resources to the best effect.
- Continuing to achieve a reduction in drug related offending and targeting the supply of controlled drugs.
- Using appropriate enforcement measures against premises that are being used for drug use, supply or production.
- Involving young people in the design of alternative activities to alcohol consumption.
- Ensuring that schools and colleges offer a range of wellbeing / harm reduction and resistance programmes for young people.
- Working with off and on licence holders to improve practice to support the well managed supply of alcohol.
- Running test purchasing operations to detect the sale of alcohol to under 18s.
- Taking enforcement action against illegal sales of alcohol to young people and sales of alcohol to adults who supply alcohol to young people.
- Conducting partnership operations to combat alcohol related violent crime.

We will monitor our performance using these measures:

Drug-related (Class A) offending rate

Successful completions of drug treatment rate

Perceptions of drug use or drug dealing as a problem

Improved monitoring of drug treatment effectiveness

Alcohol-harm related hospital admission rates

Perceptions of drunk or rowdy behaviour as a problem

Membership numbers of Salford's off-licence responsible retailer scheme

Number of age restricted product test purchases undertaken

Delivery and performance monitoring

The key to delivering this strategy is effective partnership working.

No one agency can deliver all the activities that will ensure that we achieve our objectives.

This Community Safety Strategy will be delivered by:

The Salford Community Safety Partnership

The Salford Community Safety Partnership comprises public and private agencies each with their part to play in reducing crime and disorder and making our neighbourhoods safer, cleaner and greener. This is the strategic delivery partnership delivering the 'safe city' theme on behalf of the Salford Strategic Partnership, known as Partners IN Salford. Members of the partnership are listed at Appendix one.

The partnership has an action group called the Partnership Delivery Group which meets every month. Members of this group include all neighbourhood police inspectors and neighbourhood managers and their task is to identify what crime and disorder reduction activity needs to take place across the city, directing the resources of each appropriate agency to tackle issues of concern.

Neighbourhood teams

In Salford we have eight neighbourhood management teams and five neighbourhood police teams covering the whole of the city. These teams work closely with their local communities to identify local crime and disorder concerns. Specific actions outlining how these will be addressed are written into local community action plans.

In each of the eight neighbourhoods, neighbourhood managers and neighbourhood police inspectors meet with officers from other appropriate agencies on a monthly basis to address local issues and to direct the resources needed to tackle these issues. These local partnership delivery groups report back to the city wide Partnership Delivery Group.

The people of Salford

It is the duty of all citizens to play their part in increasing community safety and bringing offenders to justice. The community can contribute by reporting crime and disorder and supporting criminal justice agencies, and by taking responsibility for their personal safety and the safety of others.

Salford has a vibrant volunteering sector which many adults get involved in, by, for example, organising positive activities for young people.

How to get involved

Everyone who lives and works in Salford can contribute to making all our communities safer by:

- Getting involved with your community committee.
- Getting involved with local community projects such as the 'Friends of Parks' projects and neighbourhood watch schemes.
- Getting to know and working with the neighbourhood police teams including the local beat officer and police community support officers.
- Reporting crime to your local police or through the anonymous Crime Stoppers number and supporting police and partners in investigations.
- Getting involved in local voluntary work such as organising positive activities for young people.

For details of how to contact neighbourhood teams see Appendix two.

To report crime or anti-social behaviour:

Report crime in confidence at Crimestoppers 0800 555 111.

To contact the police in an emergency call 999,
in a non-emergency call 0161 872 5050.

To report anti-social behaviour call 0161 909 6544.

To report environmental crime such as graffiti or fly-tipping call 0161 909 6500.

How we will measure performance

As a partnership, we will agree performance indicators that reflect the priorities and outcomes that we want to deliver. We will set challenging targets and measure these four times a year to check that we are making the right progress.

How we will monitor performance

The key to effective delivery of crime and disorder reduction is to understand what and where our problems are and directing our partnership resources efficiently and effectively.

The Community Safety Partnership uses the National Intelligence Model (known locally as the Greater Manchester Against Crime Business Model) to analyse and understand crime and disorder patterns. The Partnership Delivery Group and the local partnership groups use this information to deliver services in the right place at the right time.

Overall trends in crime and disorder are monitored regularly and how we are performing against our targets is reported to the Community Safety Partnership Executive Group, a body that includes the most senior service managers and the elected councillor with responsibility for community safety. Additionally, elected councillors sit on a scrutiny committee which challenges partnership performance.

The executive group reports progress to the Salford Strategic Partnership (Partners IN Salford).

Communications strategy

It is essential that the people of Salford are regularly informed of our progress and can hold service agencies to account for their performance.

Communicating our progress that crime and disorder is falling to the people of Salford and challenging perceptions that crime and disorder is high is fundamental to achieving our aims.

This Community Safety Strategy is underpinned by a marketing and communications strategy that sets out how we will inform local people about community safety progress and how we will engage and empower people to make all our communities safer.

We will use a variety of means to communicate with local residents and businesses including local magazines and leaflet drops, reporting to neighbourhood community committees, holding public meetings and keeping our web pages up to date.

Appendix 1

List of partners

This list of partners is not exhaustive. We welcome new partners who can contribute to crime and disorder reduction activity.

City West Housing Trust
Council for Voluntary Services
Criminal Justice Board
Crown Prosecution Service
Drug and Alcohol Action Team
Greater Manchester Ambulance Service
Greater Manchester Chamber of Commerce
Greater Manchester Fire and Rescue Service
Greater Manchester Police – Salford Division
Greater Manchester Police Authority
HM Prison Service
Primary Care Trust
Registered Social Landlords
Salford City Council
Salford Magistrates Court
Salford Probation Service
Salix Homes Limited
Transport for Greater Manchester
University of Salford
Victim Support and Witness Service
Youth Offending Service
