The map has been produced in accordance with PPS29: Development and Flood Risk and the Technical Guidance.

The map includes the maximum flood depths for the level 1:100 Flood risk and as per data from the DCLG Flood Mapping Group and DEFRA (2011). In accordance with the Flood and Water Management Act 2010, the Environment Agency has calculated flood depth levels at designated locations treating the flood risk area as a unitary flood risk area.

The map has been produced as a result of a Digital River Map (DRM) project undertaken by the Environment Agency, Water England and South West Water.

The accuracy of river channel boundaries and flood risk data varies, therefore data should only be used for planning purposes and not in a legal context.
